1. Introduction

Welcome to Ex-scavenge-anza,

Have you tried putting together a scavenger hunt? In the past, scavenger hunts were difficult to create. This is where Ex-scavenge-anza is here to help.

Ex-scavenge-anza allows for scavenger hunt creation with ease. All you have to do is click and your clue will be created. Originally, the plan was to unveil this application on a university campus for new/transfer students to get acclimated to the campus. Come to find out, this application can be used at parks, in cities, and neighborhoods all around the world! All you need is a wi-fi connection and an Android device (running API 26 or higher) to get started!

Get ready for an adventure!

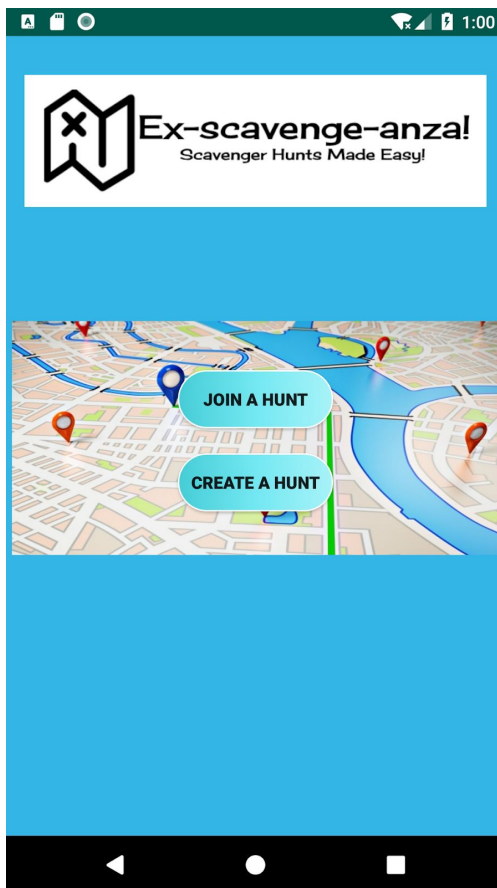

2. Getting Started

2.1 System Requirements

1. Android Device on API 26+
2. Must have Wi-fi connection for accurate geolocation
3. Must allow proper geolocation permissions on device

2.2 Quick Start

1. Open application.

2. Choose between:
 - a. Create
 - i. Reference section 3.1 for manage use.
 - b. Join
 - i. Reference section 3.2 for participant use.

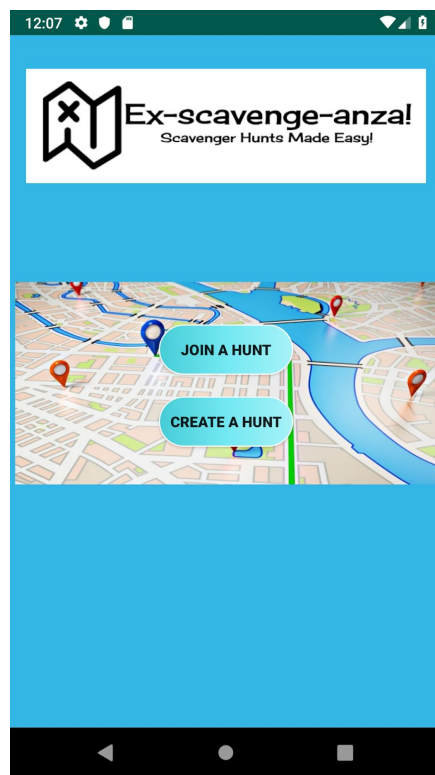

3. Main Scenarios of Use

****Remain in the application during creation and joining. If you exit the application all data will not be saved and you will have to start over.**

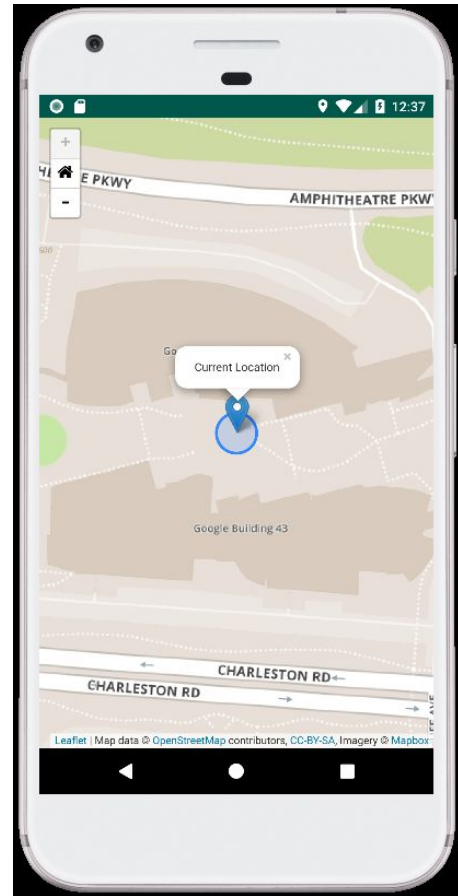

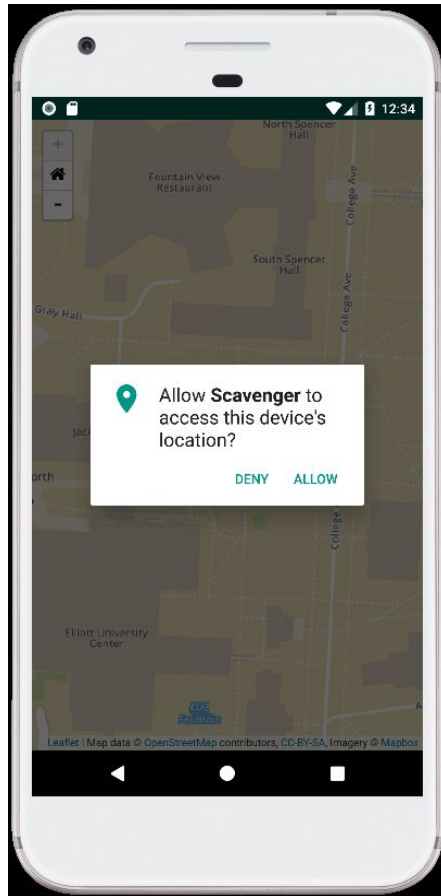

3.1 Manage Hunt/ Hunt Creation

1. Clue/Point of Interest (POI) Creation

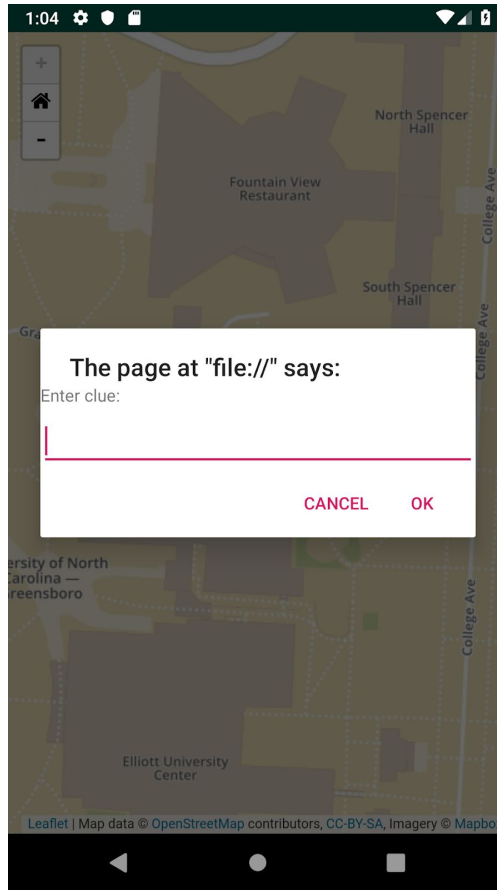

Click [create] on the main screen.

Allow geolocation permissions

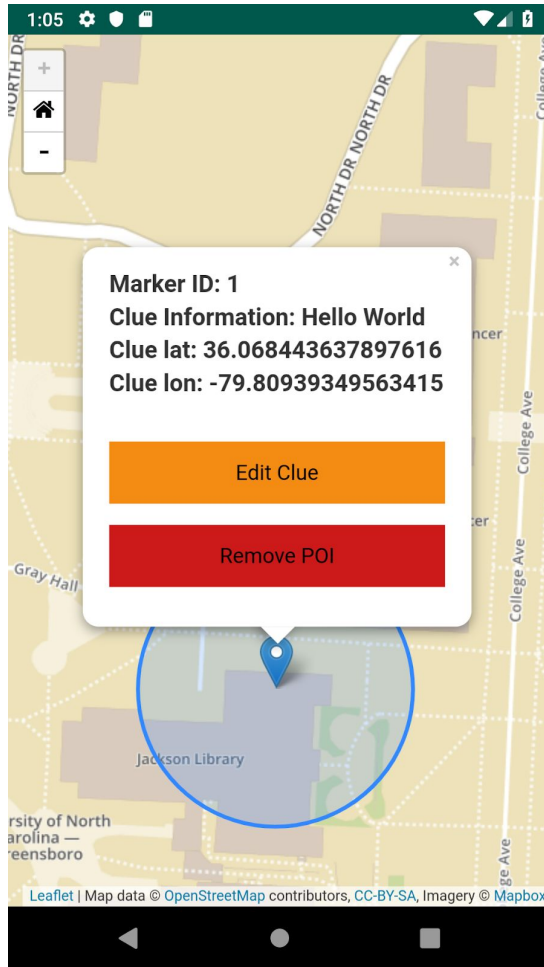

Click anywhere on the map to create a new POI.

- i. The app will ask you to enter the clue for the specific POI.

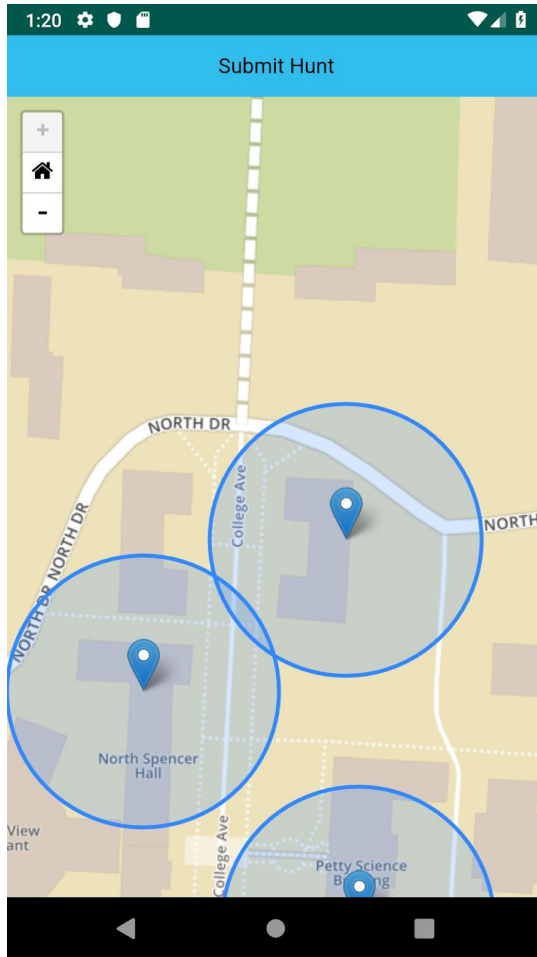

You are able to edit and delete clues by clicking that specific POI.

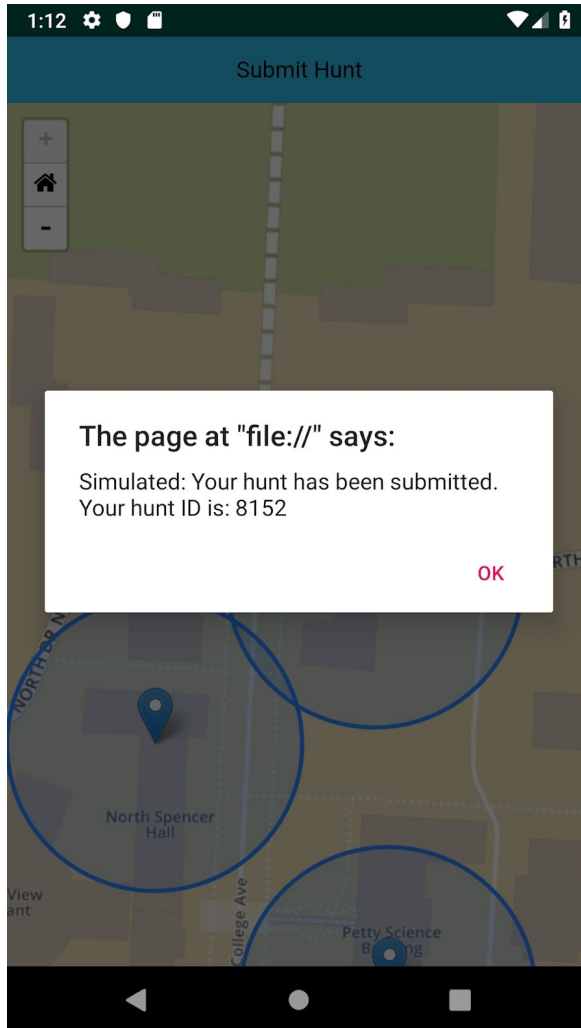

****Reminder: For Ex-scavenge-anza v1.0 POI creation is limited to 5.**

2. Submitting Hunt

After five POIs have been created, you will be prompted with a button to submit the hunt if you are satisfied with your current progress.

After submitting, you will receive a hunt ID that will give participants access to the application.

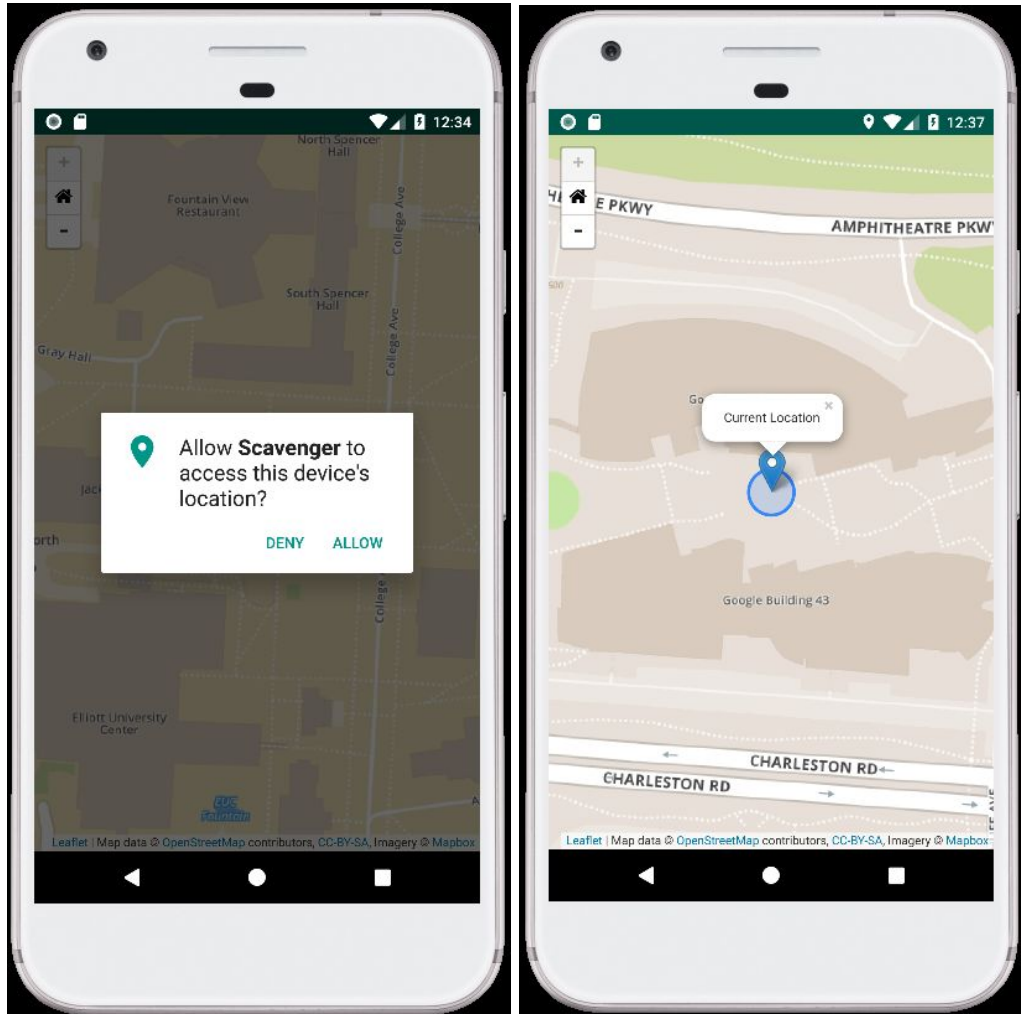

3. Hunt Deletion

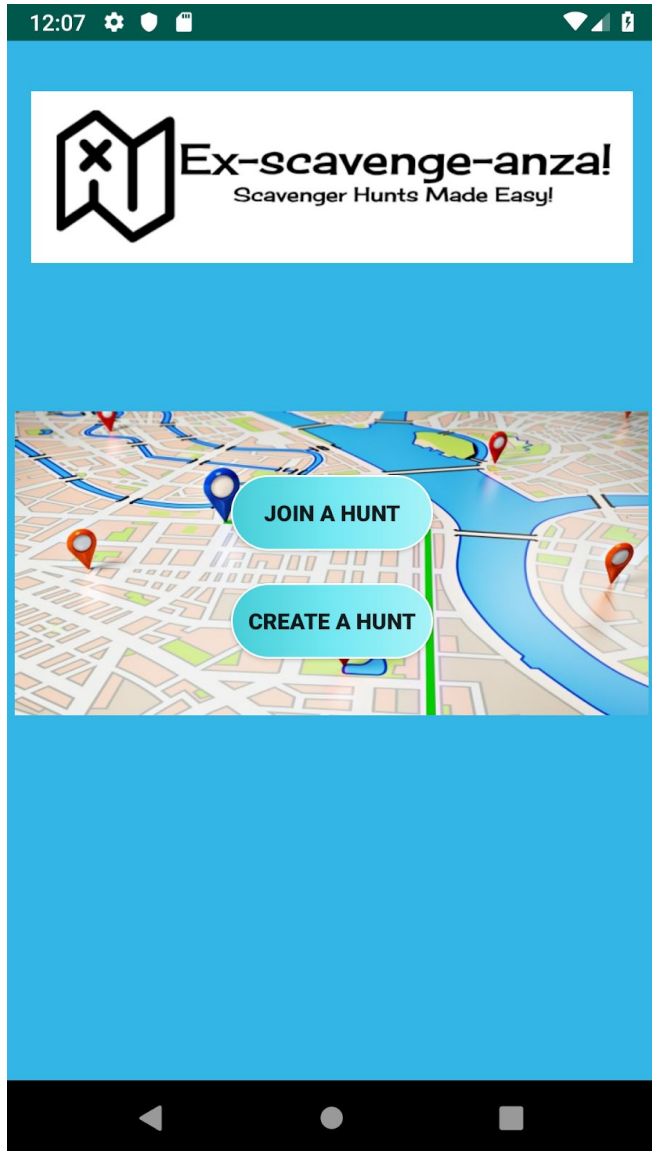

For v1.0 you will have to delete POIs that have been created to make a new hunt. Submission of a new hunt will result in a new hunt ID for participants to access the application.

3.2 Join Hunt/ Participant

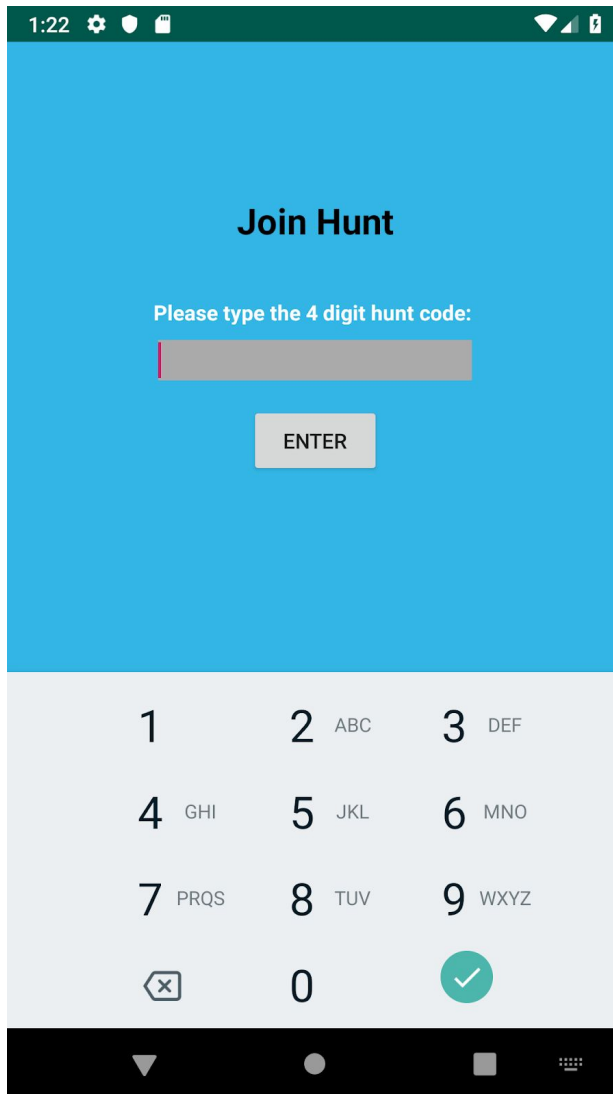

1. Allow geolocation permissions

2. Join Hunt
 - a. Hunt ID in hand
 - i. Click [join] on the main screen.

- ii. Type in ID in the space provided.

1. Clues will appear on screen.
 - a. Still in progress
 2. Walk to location.
 - a. Still in progress
 3. Clues will be marked off as you complete them.
 - a. Still in progress
- b. No Hunt ID
- i. You can create a hunt and obtain a hunt ID
 1. Refer to 3.1.
 - ii. Obtain a Hunt ID from a hunt creator.
3. Leave Hunt
- a. Exit application to leave hunt.
